

Thoughtful UX Designer (m/f)

About us

We are a bunch of passionate developers, designers, miracle workers, and transformers who have one mission: Build METRO's Multi-Channel wholesale business of the future. We closely listen to our customers in order to build and continuously improve applications that cater their specific needs but are still highly scalable.

Together with us you will build great user experience in an international and continuously evolving ecosystem of applications and services.

Joining our team means working in a startup-like atmosphere while being part of an international market-leading specialist in wholesale and food retail. Indeed, METRO operates in 35 countries and employs more than 150,000 people worldwide serving more than 21 million customers. In the financial year 2015/16, METRO generated sales of around €37 billion. Moreover, we are an equal opportunity employer. We offer all qualified employees and applicants identical chances.

What you can expect

- Small agile teams consisting of product owners and developers as well as UI and UX designers.
- A vital design and UX expert community creating wireframes and screen designs for multiple use cases from various countries.
- A customer centric organization where user research and testing is recognized as a corner stone of every development.
- A dynamic start-up-like environment where still many new projects and teams are forming and where you can make an impact.
- An open atmosphere and working culture where information and knowledge is exchanged and transformed into action.
- A set of great design tools to work with like a living style guide and UI pattern libraries, which you will contribute to and shape.
- A team of passionate UI and UX designers loving to exchange and learn from each other to build great user experience.
- A lot of fun, freedom for your own creativity and great people.

Your profile

- You have a strong design thinking and customer oriented mindset.
- You are a highly motivated team player, who is still eager to learn and has a self-organized way of working.
- Understanding business people and talking to designers and developers is no mystery for you.
- You are continuously thriving to improve the products and services your team provides.
- Doing UX design and wire framing with tools like Balsamiq, Sketch, Axure or even on paper is part of your daily work.
- You gained profound working experience in UX processes and tools including user research as well as prototyping and (AB-)testing.
- It is no hurdle for you to express yourself in English language.
