

# Passionate Sitecore Developer (m/f)

## About us

METRO supplies food for 25 countries. We at METRONOM provide the backbone for this – making sure that everyone gets their food on the table. ;)

METRONOM is responsible for the framework behind the delivery right to the customers' doorstep. We design, implement, test, continuously deploy and run hundreds of micro services and digital solutions driving our business from sourcing up to checkout or delivery.

How do we do it? Our agile product teams are the ones choosing the technologies and working methods, allowing for fast decisions and reactions to customer needs.

## Join us

Joining our team means working in a startup-like atmosphere while being part of an international market-leading specialist in wholesale and food retail.

If you want to set the pace of food and technology, get in touch with us:

Pascal Schumann

## What you can expect

- An agile development environment with pair programming and code reviews.
- You are involved in all phases of software engineering, from conception over implementation to testing and delivery.
- A strong focus on collaboration, people, and self organization.
- An international work environment with colleagues from all over the world.
- You work in small independent teams to develop customer-oriented services and applications.
- A flexible use of innovative technologies.
- A constant exchange of knowledge within your team and other members of the organization.
- Freedom for own ideas and a “never stop” learning culture.

## Your profile

- You have comprehensive experience in developing CMS based web applications (ideally with Sitecore).
- You have profound knowledge of the C# .NET technology stack.
- You are familiar with REST, JSON, HTML, CSS, CSS Frameworks like Bootstrap, and JavaScript.
- Ideally you have experience with Sitecore 8.x, TDS, SOLR, Sitecore Rocks, Unit Testing, and Front-End Testing.
- You are eager to constantly learn new technologies.
- You have enthusiasm for automating and automatically scaling tests and deployments.
- You are already developing software “full stack” meaning from the front end over the back end to the persistence layer or you want to learn how to do it.
- You have fun solving complex problems and you want to work in a team that shares this ambition with you.
- You have experience with agile development methodologies.

## Benefits

Permanent employment • In-house workplace and an international work environment • High personal responsibilities • Flexible working-time models • Remote / home working supported • Preventive healthcare services • Good infrastructure (free parking spaces, various nearby shopping facilities) • Latest technologies • Exciting projects

METRONOM is an equal opportunity employer. We do not discriminate against any qualified employees or applicants.
