

# Passionate Software Developer (m/f)

## About us

We are a bunch of passionate developers, designers, miracle workers, and transformers who have one mission: Build METRO's Multi-Channel wholesale business of the future. Using the newest technologies, we develop and deploy more than 150 microservices every day which are used to process millions of our customers' requests and orders.

Joining our team means working in a startup-like atmosphere while being part of an international market-leading specialist in wholesale and food retail. Indeed, METRO operates in 35 countries and employs more than 150,000 people worldwide serving more than 21 million customers. In the financial year 2015/16, METRO generated sales of around €37 billion. Moreover, we are an equal opportunity employer. We offer all qualified employees and applicants identical chances.

## Join us

If you want to lead the digital revolution of wholesale business, get in touch with us:

Pascal Schumann

## What you can expect

- You are involved in all phases of software engineering, from conception over implementation to testing and delivery.
- You work in small independent teams to develop customer-oriented services and applications.
- An agile development environment with pair programming, code reviews, and continuous deployment.
- A high working quality, ensured by extensive test automation.
- A flexible use of innovative technologies.
- A constant exchange of knowledge within your team, with our project managers/product owners, and external partners.
- An international work environment with colleagues from all over the world.

## Your profile

- You have profound knowledge in some programming language (of your choice).
- You are eager to constantly learn new programming languages and technologies.
- You have enthusiasm for automating and automatically scaling tests and deployments (with Docker and Kubernetes).
- You are interested in splitting large projects into small, manageable subprojects with microservices.
- You are already developing software "full stack" meaning from the front end over the back end to the persistence layer or you want to learn how to do it.
- You have fun solving complex problems and you want to work in a team that shares this ambition with you.

Regardless whether you have already several years of professional experience or you come directly from the university – we have a position for you.

## What we offer on top

a great team • flexible working time • home office • individual trainings  
• career improvement programs • support for child and home care •  
various health and sports programs • team events • free coffee
